New Products:

Pressure Trigger Added:

DataCan has added a pressure trigger option to all Piezo pressure gauges. The pressure trigger is designed to initiate a sample rate change.

Piezo Pressure / RTD / CCL

DataCan is proud to introduce the addition of a CCL (Casing Collar Locator) to its leak detector tool. DataCan can now record bottom hole pressures, external temperature, and depth.

Permanent Monitoring

Engineering is currently focused on developing a next generation surface data box.
Improvements will focus on the installation and transportation aspect of the surface completion.

Software Version 1.2.6

Major additions have been made to our program and download software:

A language section has been added. Contact us to add your language.

We changed how the graph functions are used by the user. When the user clicks on the graph, the vertical line will appear even if the user is not pointing near a data point. We also sped up the time to click between points and modified the way a user inputs a gradient point.

DataCan would like to thank its customers for their help in making our software more user-friendly. If there are any idea's you have or changes you'd like to see, feel free to contact us any time.
